WWW.ITSABOUTROMI.NL

$m$any people enjoy the city buzz, but also like to discover the quiet places in town. Walking around old and new neighbourhoods. Having a cappuccino with something sweet from a local bakery. Cycling through the park on your way to that vintage shop to find an unique piece.

Exactly those city vibes we have in mind when designing urban lights. We have added new cities; Carrara with a marble print, Bremen and Salamanca with multiple shades and Porto for cozy light in dark corners.

Since 2019 we are partner of Eden Reforestation Projects. They plant trees around the world for the purpose of reforestation and reducing extreme poverty through employment of local people.

So far we have planted over 230.000 trees with your help. We thank you for your support to the green revolution to restore nature.

With kind greetings from the heart of Amsterdam,
Royni team

NOTES
@ Explanation of Kelvin and Lumen:
Kelvin (K) indicates the colour of light. High Kelvin is cold light.
1500K = candle light
2300-2400K = warm, white light in a living roam
$3000 k=$ light ta read/wark

Lumen (L) indicates the brightness of light. High Lumen is bright light
